

SCOV Stained and Fused Glass Monitor Training

Purpose:

To ensure understanding of established safety and equipment procedures. All members must complete a safety training class if they wish to access the studio when an instructor is not present.

Safety Monitors are required to be trained to:

- Safely use all equipment that is readily available to membership I.E.: not locked up.
- Understand and follow all Safety Rules.
- Understand and follow all Cleaning Rules.
- Understand and follow all General Studio Rules.
- Follow all Stated Policies and Procedures.
- Understand how and when to use an incident report form.
- Identify safety awareness signs like members not wearing safety goggles.
- Safety monitors must be willing to help any member who is not following proper safety rules.
- After successful completion of Safety Monitor training they will be given the combination to the studio door.

Instructor Monitors (level 2 safety):

Must meet all requirements for a Safety Monitor plus:

- Will have the responsibility of supervising members during established monitor hours or classes.
- They will be given combinations to the locked cabinets
- Required to assist all members with use of equipment requiring a two-person rule for safety (chop saw, ring saw, etc.).
